

ACetylocystein

Dietary supplement.

Effervescent tablets, cherry flavour.

Contains sweeteners.

N-acetylcysteine (NAC) is a stable form of the non-essential amino acid cysteine. It is an amino acid that contains sulfur aiding in the production of glutathione. Glutathione is a potent antioxidant that scavenges free radicals.

Content:

Ingredients: acidity regulators: citric acid, sodium carbonates; N-acetyl-L-cystein; bulking agent: sorbitols; red beet juice concentrate in powder (red beet juice concentrate; maltodextrin; acidity regulator: citric acid); anti-caking agents: polyvinylpyrrolidone, polyethylene glycol; flavourings; carrot concentrate in powder; sweeteners: cyclamates, saccharins.

Content of active ingredients in a recommended daily intake-1/2 tablet (% of NRV):

N-acetyl-L-cysteine	300 mg	-
---------------------	--------	---

Product may contain **lactose** (from **milk**).

How to use:

Dissolve ½ tablet in 100 ml of cold water.

Do not exceed the recommended daily intake.

Dietary supplements should not be used as a substitute for a varied diet.

A balanced diet and a healthy lifestyle are important to stay healthy.
