

Medistav

Medistav is a special formula designed for people at risk of overloading the joints and wanting to strengthen the muscles, bones and joints. The formulation has been developed together with the people who practise sports and experts in the field of pharmacology and arthopaedics.

Content:

Boswellic acids (*Boswellia serrata*) – help to maintain healthy joints and ensure their elasticity

Hydrolysed collagen – basic protein building human body; important component of cartilage, bones, joints, ligaments and muscles

Vitamin C – helps in proper production of collagen, ensures proper functioning of bones and cartilages
Hyaluronic acid – type of polysaccharide located in the extracellular matrix of connective tissue, synovial fluid, hyaline cartilage and intervertebral disc nucleus

Multi Mineral Complex - natural calcium source (Lithothamnion Calcareum)

Manganese - involved in proper formation of connective tissue and maintaining healthy bones

Zinc - contributes to normal protein synthesis

Vitamin D3 – assists to maintain healthy bones and muscles; ensures optimal absorption of calcium
